

VIRES Simulationstechnologie GmbH provides software solutions for creation, animation, visualization and sensor perception of virtual environments for ADAS and active safety systems. We support our customers in the automotive and rail sectors in their efforts to shape the future of mobility. VIRES is a member of MSC.Software Group of companies and is owned by Hexagon, a leading global provider of information technology solutions.

For our office in **Bad Aibling**, we have an open position

Content Creator (f/m) for 3D-Visualization

This position is part of our creative team that uses CAD data to create real-time 3D graphics, creating fascinating virtual worlds. You are the interface between our creative designers, the development team and various contact persons on the customer side.

Your tasks

- Contribution to customer projects from the automotive- and railway sector
- Converting CAD-data for visualization of 3D-models for real-time engine
- Realization of 3D objects and environment for a generated virtual world (terrain, cities, roads, vegetation)
- Inserting external data in our Road Designer software

Your qualification, knowledge and experience

- Good spatial perception, superb eye for architecture along with a certain mathematical understanding
- Preferably an educational background in media-design or similar specification
- Previous work experience in the field of 3D-Visualization using 3ds-max
- Good texturing skills using Photoshop, Quixel Suit or Substance Designer
- Skills in Linux and basic knowledge of programming is a plus
- Advantageous basic knowledge in railway traffic
- Very good german and good english language skills

We offer

- Flat hierarchy and fast decision making
- Interesting and challenging tasks
- Flexible working hours
- Good working atmosphere in an international and creative team

Are you interested in being a part of shaping the world of autonomous driving?
